

# Chicane Refurbishment & Salvage Management Services

## COMPANY PROFILE

APRIL 2025

## About us

**Chicane R&SMS** is headquartered on the Rustenburg Platinum Mine premises and proudly services various sectors of the mining industry across Rustenburg, the North West Province, and beyond. As a Level 2 B-BBEE company, our core focus lies in **Mine Salvage Management**.

With over **26 years** of operational experience, Chicane R&SMS has developed and refined industry-tested procedures and controls, resulting in a solid track record of reliable and effective salvage services. Our expertise is backed by a strong commitment to operational excellence and environmental responsibility.

We are currently affiliated with leading mining groups, including:

- **Sibanye Stillwater (Kroondal Operations)**
- **Sibanye Stillwater (Marikana Operations)**
- **Glencore**

Our longstanding partnerships with these industry leaders reflect our reputation for reliability, compliance, and the ability to deliver tailored solutions that meet the evolving demands of modern mining operations.

Over the years, Chicane R&SMS has established world-class refurbishment practices for recovered equipment and materials, contributing to sustainable mining practices and cost-effective asset recovery.

Our continued growth and innovation within the mining industry underscore our unwavering dedication to quality service, operational integrity, and responsible salvage management.

## **Mission**

Our mission is to deliver sustainable, efficient, and high-quality solutions in the recovery, refurbishment, and reuse of mining equipment and materials. We are committed to extending the life cycle of valuable assets through expert repair, responsible salvage practices, and innovative resource management. By upholding the highest standards of safety, environmental compliance and operational excellence, we aim to support our clients in reducing waste, minimizing costs and contributing to a more circular and sustainable industry.

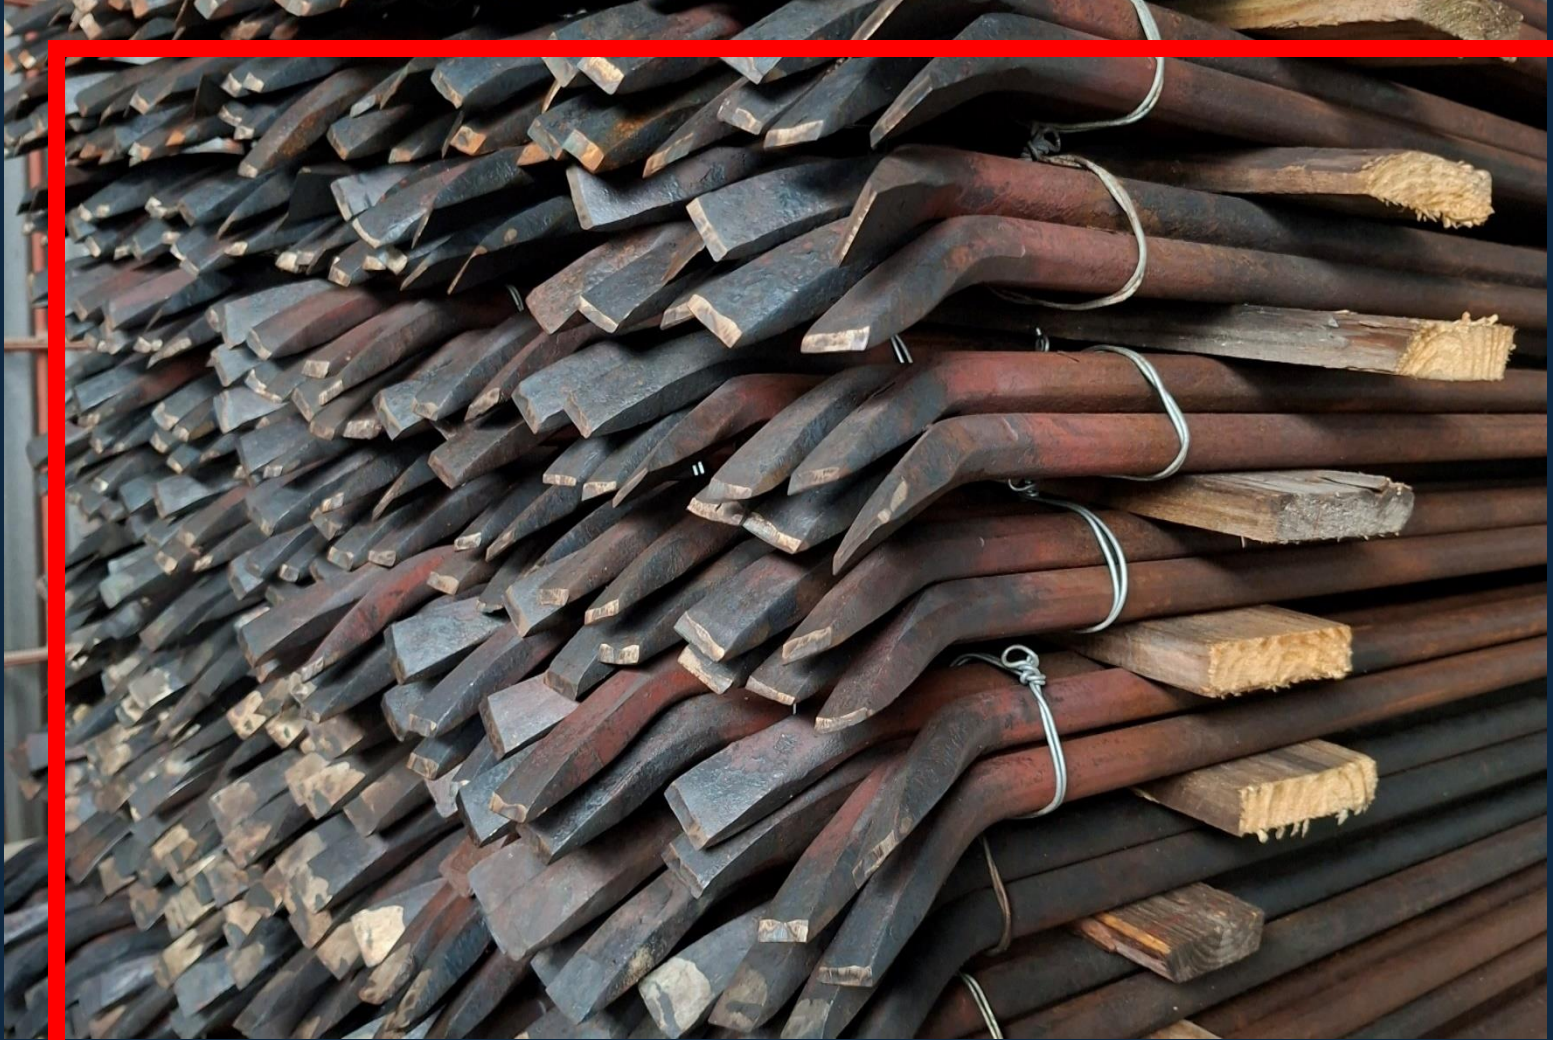

## Scope of Operations

Salvage Management Services  
Waste Management Services  
Refurbishment Services  
Engineering Facilities  
Management of Old and Stray Explosives  
Copper Cable Granulation

## Salvage Management and Waste Management Services

Chicane R&SMS offers comprehensive salvage and waste management services that encompass a wide range of operations. Scrap material and waste is collected from various mining sites and transported to Chicane R&SMS Salvage Yard, where it undergoes thorough sorting and categorization into various commodities such as ferrous and non-ferrous metals, cables, motors, plastics, general waste, and recovered hazardous materials. Repairable items are removed during the sorting process. Once sorted, salvageable metals and components are processed for resale, recycling, or repurposing, while repairable items are sent to the Refurbishment and Engineering Facilities for processing. All hazardous and toxic materials are handled in full compliance with environmental and safety regulations. The facility also monitors waste volumes to ensure sustainable operations. Detailed records, including all weighbridge tickets, are maintained to support transparency and regulatory compliance.

## Refurbishment Services

Chicane R&SMS maintains fully functional workshops that includes Refurbishment, used and new fabrication and Engineering Machine shop facilities where we are operational on the following activities, which we market to the mines in the area.

### Blacksmith Workshop

	<u>Refurbish</u>	<u>Fabricate New</u>
● Eyebolt Wedges	X	X
● Snatch blocks	X	
● Snatch block Cheek Plates	X	
● Cold Sets	X	X
● Pinch Bars (all Sizes)	X	X
● Marlin Spikes	X	X
● Cold Set Chisels	X	X
● Jumper Extractors	X	X
● Anfex Loaders	X	
● Camlock Props	X	X

## Engineering Facilities

### **Refurbishment and Repairs Facility**

At Chicane R & SMS, we proudly operate a dedicated Refurbishment and Repairs Facility specializing in the restoration and servicing of used mining equipment. Our facility is equipped to handle a wide range of repair and maintenance tasks, ensuring equipment is returned to peak operational performance with extended service life.

Central to our operations is our highly skilled and certified Blacksmith, whose expertise plays a crucial role throughout the repair process. From precision welding and component fabrication to structural reinforcements and part replacements, our blacksmith oversees each step with meticulous attention to detail and industry-standard best practices.

Whether it's heavy machinery, mechanical components, or custom-fabricated parts, Chicane R & SMS ensures every piece of equipment undergoes a thorough inspection, followed by necessary refurbishments that meet both safety and performance standards. Our commitment is to deliver cost-effective, reliable, and durable solutions that help our clients minimize downtime and maximize productivity.

### **Steel Fabrication Facility**

We operate a steel fabrication workshop in which we use new material and reusable material salvaged during the sorting process to fabricate new products. This facility is available upon request.

### **Machine Shop Facility**

Chicane R & SMS operates a fully equipped Machine Shop Facility designed to support the repair and restoration of salvaged mining equipment. This facility plays a vital role in our operations, especially when addressing urgent maintenance repairs and breakdowns across various areas of the mine.

Staffed by a qualified fitter-and-turner, our machine shop delivers precision machining, component fabrication, and custom part modifications to ensure quick turnaround times and high-quality workmanship. Whether it's routine maintenance or critical emergency repairs, the machine shop is a key element in keeping mining operations running smoothly and efficiently.

## Management of Old and Stray Explosives

Chicane offers fully legal and compliant removal and destruction of used, unused and stray explosives, carried out by a Trained and Certified Explosive Destruction Officer. We ensure secure transportation of all explosives and handle each step of the process with the highest standards of safety and discretion. Destruction is conducted using a secure explosives destruction box at a certified secure blasting site, ensuring full compliance with legal and environmental regulations.

## Copper Granulation Plant

At Chicane, we operate a fully licensed copper granulation plant, committed to the responsible and efficient processing of copper materials. Our state-of-the-art facility produces high-quality granulated copper that meets stringent industry standards. In line with our dedication to ethical sourcing and regulatory compliance, we do not purchase materials from the general public. Furthermore, we only sell our processed copper to licensed buyers, ensuring that every transaction adheres to legal and environmental regulations. Once processed, the copper granules are securely transported to a designated safe location, maintaining the integrity and traceability of the material throughout the supply chain.
